

Set of bleeding unit adapters "E-Mobility"

Description

The ATE set of bleeding unit adapters "E-Mobility" includes four selected bleeding unit adapters. It covers the majority of current electric and hybrid vehicles on the European car market. The bleeding unit adapters are well arranged in a stable plastic case to be readily to hand.

You can use the QR code on the case to access the latest vehicle applications. The bleeding unit adapters were selected to especially cover the most frequently registered vehicles, such as: Renault Zoe, VW e-Golf / ID3 / ID4, Tesla Model 3 / Model S, Hyundai Kona, Nissan Leaf, BMW i3 and many more.

Benefits

- | Well arranged in a plastic case
- | Collection of the most important bleeding unit adapters for most electric and hybrid vehicles

Shipment

- | Plastic case
- | Bleeding unit adapters:
